Directions for Completing the Evaluation:

This evaluation form incorporates the Interstate New Teacher Assessment and Support Consortium (INTASC) principles. These principles reflect the essential knowledge, skills, and dispositions necessary for the teaching profession. Information about the alignment of state standards and national standards may be found in the *Student Teaching Handbook*.

The student teacher is to be evaluated on each of the ten InTASC principles. Examples of items for each principle are listed in the column next to the principle description. The examples are only suggested items to consider in evaluating the student teacher's ability to demonstrate knowledge of the principle. The items may or may not have been observed. Please note that since the student teaching experience is considered practice teaching, student teachers should be evaluated based on their student teaching performance. Use the following guidelines to determine whether the student teacher's performance is considered *Target (T)*, *Acceptable (A)*, *Unacceptable (U)* or if the standard was *Not Applicable (NA)* at the time of the evaluation.

- *Target*-the student teacher demonstrated outstanding knowledge of and use of skills, concepts, and dispositions associated with the standard and is open to learning or receiving guidance to improve his/her performance.
- *Acceptable*-the student teacher demonstrated satisfactory knowledge of and use of skills, concepts, and dispositions associated with the standard and is open to learning or receiving guidance to improve his/her performance.
- *Unacceptable*-the student teacher had little or no understanding of the skills, concepts, and dispositions associated with the standard and/or had no interest in learning or receiving guidance to improve his/her performance.
- *Not Applicable*-there was insufficient data for evaluation of this standard. An example of "not applicable" is that often at midterm, the college supervisor and the mentor teacher have not had an opportunity to see the student teacher perform in all areas, and therefore have no way to judge proficiency.

After reviewing the standard description and examples of items to consider, circle the appropriate category (T, A, U, or NA) in the last column to indicate your rating of the student teacher's level of competence for the standard. The overall evaluation of the student teacher will not include a penalty for the NA response. There is a space within each standard to write suggested improvements for the student teacher.

IMPORTANT NOTICE: The student teacher may be removed at any time during the student teaching experience if the Education Department determines the student teacher's progress is not satisfactory and the minimal competence cannot be achieved or, the dispositions are not being met consistently or, in the judgment of the Education Department, the student teacher's presence in the classroom is a detriment to the students in the hosting school. In each case, the student will be allowed due process as outlined in the handbook. An alternate experience may be created or the student will register for a class on campus. Elementary Education majors would graduate with a degree in Elementary Education without certification, and secondary students would graduate with a degree within their discipline without certification.
