

Cornell Snapshots

Saturday, November 5

10:45 a.m. – 11:45 a.m.

Description	Location
<p>Creative Holiday Entertaining-FULL</p> <p>Join the Sodexo Dining Services team for holiday entertaining tips. We will make and sample a variety of holiday appetizers. Also enhance your entertaining skills by learning about tablescaping and wine presentation. Participants will receive handouts with the tips and recipes discussed in the session.</p>	Harlan, upper level of the Commons
<p>Cornell History 101</p> <p>Travel through 150 years of Cornell history and learn the stories of Cornell's founding fathers and mothers, as well as the lore of its National Historic Register campus and the people who have passed through it since 1853. Your guide is Cornell Marketing and Communications staff member Jamie Kelly.</p>	Hedges, middle level of the Commons
<p>Cornell's Extraordinary Opportunities</p> <p>Cornell College prides itself on providing one extraordinary experience after another. So what does that mean exactly? Come hear from the students themselves and how they have utilized the opportunities available to them!</p>	Stockholm, lower level of the Commons
<p>Technology Tools for Career Development</p> <p>Cornell students have access to a wide variety of technology tools to advance their professional and career development. This session provides a demonstration on several technologies used by the Career Engagement Center to help students: JOIN, the job and internship network; InterviewStream, an online mock interview program; Going Global, a powerful search engine on jobs, internships, and city information; and Cornell College CAN! on LinkedIn, a professional social networking tool. Family members will walk away with greater knowledge on how these technologies can help their student be successful in preparing to apply their liberal arts education to the world of work.</p> <p>Session presenters Mike Johnson '12, Career Assistant, Career Engagement Center Jennifer Loewen '14, Career Assistant, Career Engagement Center Meaghan Fisher '14, Career Assistant, Career Engagement Center RJ Holmes-Leopold '99, Director, Career Engagement Center</p>	Berlin, lower level of the Commons

Funky Science Club-FULL

005, West
Science

The Funky Science Club is an informal group of students who get together to explore some of the more creative aspects of science. We've done things like using strobe lights to make water appear to flow in slow motion.

We've made our own strobe lights, as well as learning the principles governing strobe light operation. We've also made circuits to modulate high voltage with audio signals which results in "musical sparks".

We've made plasma globes, holograms, inverting goggles, built virtual worlds and more. If you'd like to do creative things with science then I invite you to join us to learn more about science and explore it in ways you won't often encounter in traditional science class.

Why are Romantic Outlooks Always on the Edge of Cliffs?

Paris, lower
level of the
Commons

Have you ever wondered why romantic outlooks often times place you at the edge of a cliff? Or have you ever wondered why after driving in rush hour traffic you get into an argument with your parents as soon as you arrive home? These are just a few examples of a phenomenon called the "Misattribution of Arousal". In this lecture we will explore the many situations in which misattribution can occur as well as the theory behind why we could be so wrong about the source of some of our most profound emotions. Until then, you may want to watch how people's behavior around you changes this summer after a particularly arousing event...or even...a strong cup of coffee.
