

2+2 Program | BUSINESS

Business majors at Cornell have several options to refine their course of study to specific challenges in the business environment. Some students prefer to approach business studies from a wide perspective, understanding how markets work across many business settings. Other students pursue specialized pathways such as finance, business analytics, personnel management, and actuarial science. Whichever path you choose, you will get hands-on experience with business problems and focused attention from your professors in small classes where you'll fully engage with your classmates and faculty.
